Summary

Mathematical Engineering student (graduating soon) interested in both research and learning the Cloud/DevOps Engineer profession. Good programming skills obtained in the Bachelor's. Disciplined, a quick learner, with high motivation about moving around the world for work. Currently implementing an approximation algorithm for the Service Chain Embedding problem for my master thesis and the Azure tools for DevOps.
Available from Sept 2023

Education

Cisco Networking Academy `May 2023 - Sep 2023`

Università degli studi di Napoli "Federico II"

IT Automation, Digital Transformation, Object-Oriented Programming, Network Management, Network Security

MSc in Mathematical Engineering `Sep 2020 - Jul 2023`

Università degli studi di Napoli "Federico II"

Thesis in Information Theory: IoT-Cloud Networks: an approximation algorithm for the Service Chain Embedding problem.
Relevant exams: Algorithms and Parallel Computing, Computational Fluid Dynamics, Information Theory, Operational Research, Statistical Methods for Industry

BSc in Computer Engineering `Sep 2016 - Mar 2020`

Università degli studi di Napoli "Federico II"

Thesis in Real-Time Operating Systems: Virtualization Platforms and separation kernels for mixed criticality systems: XtratuM (in Italian)

Certifications

Cambridge English Qualification: B2 Level
University of Cambridge

Personal Interests

Running and fitness in general
